

Hollywood Studio Rentals is so confident it offers the lowest prices on production equipment rentals we make the following offer:

We will beat any local Southern California production equipment rental fees by at least 10% on the exact same equipment package containing the same quantity and type of accessories and other included items rented for the same period of time.

This Lowest Price Guarantee extends to any production rental category we offer. Whether it's video, sound, lighting, grip, communications, editorial, DVD duplication, stage facilities or any other category - if someone else has it for less WE WILL BEAT THEIR PRICE.

We compare the bottom-line total of the rental or services quote. If they are less, we will drop our price. It's that easy. To be fair, the company we are beating the price on must be a real company with a real address. No private owners or quotes packaged with labor or other services.

We may require a written quote from the other rental company or find the lower rate posted on the other companies web site.

We want you to rent with confidence, receive the best possible customer service, get the most complete package and pay the least possible amount for your rental equipment or services order.

And you can quote me.
